Forms: Overview

Web Content

A simple form used to post content - text, photos.

It can use permission workflow to post.

Web Form

This form are bigger than the Web Content and are used to create survey forms. It works similar to Google Forms.

It can use permission workflow to post.

DDL

It is advanced feature used to big forms and web rich applications.

It can use permission workflow to post.

Kaleo Forms

It is a combination o two features: a **workflow** where each step use a **form**.
